

OUR 2028 VISION

OUR 10-YEAR VISION IS THAT ALL PVC-U CABLE MANAGEMENT PRODUCTS INSTALLED IN BUILDINGS ARE MANUFACTURED USING RECYCLED MATERIAL.

We believe that there should be a requirement on specifications for PVC-U systems to be manufactured from a **minimum of 50% recycled material**. Eventually we'd like recycled cable management products to be the industry norm.

Our vision is supported by our values as a family-owned, British manufacturing firm that has established a reputation for driving innovation, while remaining environmentally, community and charitably focused for over 75 years.

LAST YEAR, OUR PVC-U CABLE MANAGEMENT PRODUCTS WERE MANUFACTURED USING 80% RECYCLED MATERIAL, PREVENTING THOUSANDS OF TONNES OF PVC-U WINDOWS ENDING UP IN LANDFILL.

 **REASSURINGLY
RECYCLED**
